

Environmental Policy Statement

The directors of Intellect recognise that our activates and products have an impact on the environment and strive to ensure that our operations today do not have a negative impact on the lives of future generations. Our goal, is to prevent environmental damage and to conserve our natural resources.

The directors will commit to ensuring that reasonable sufficient funds and resources are made available to ensure that the Environmental Policy can be achieved, and will appoint and Environmental Manager that will be responsible to the Board of Directors for the implementation and continual review of the Environmental Policy

We believe that we should protect the environment both at local and global levels and are committed to continuous improvement of our environmental performance through improvements in product design, working practices and business methods

The organisation will ensure that all of its activated are carried out, as a minimum in conformance with, or exceeding current environmental legislation and regulations, and with other local requirements as dictated by clients, local authorities, local wildlife trusts EFSIS etc. we will ensure that we minimise our emissions to the air and have procedures to minimise noise disturbance to neighbours

We are committed to reduce the impact our business has on the environment by ensuring that we minimise our energy and water usage in our buildings and to minimise or waste arising's, promoting through the hierarchy of "reduce, reuse, recycle" work towards a "zero to landfill" target. In doing so, we will ensure that adequate records are maintained in order that our performance can be monitored, measured, set and reviewed with the objectives and targets within the company and effective actions taken to control the process.

The company will purchase the most appropriate and efficient vehicles for its operation and will endeavour to reduce the effect of their emissions by ensuring that they are operated correctly, serviced regularly and routed the most effectively. The company will promote vehicle sharing and alternative travel to work schemes.

The directors endeavour to purchase, as far as us reasonable practicable, products and services from suppliers and contractors that have sound environmental policies.

We will ensure arrangements are made for effective communication and the promotion of competency throughout the company by educating and training our staff to reduce the environmental impacts of their activities. We will use our newsletter and staff notice boards to publicise out targets and performance.
